

AdventureEXP Portal

Scope of Work (Version 1)

Project Overview

Develop a web-based participant placement portal for AdventureEXP that connects participants with employers and allows administrators to manage participants, employers, job opportunities, applications, reviews, and placement workflows.

The platform will include two user roles:

1. Participant (Student)
2. Administrator

The system will include role-based authentication, participant matching, employer management, job management, application tracking, messaging, and notification functionality.

MODULE 1 – AUTHENTICATION

Participant Registration

Participants will be able to create an account by providing:

- Profile Photo (Optional)
- First Name
- Last Name
- Email Address
- Time Zone
- Password
- Confirm Password

Validation

- Unique email address validation

- Password confirmation validation
 - Required field validation
-

Participant Login

Participants can log in using:

- Email Address
 - Password
-

Participant Password Recovery

Although not present in the supplied design, password recovery functionality is recommended and will include:

- Forgot Password
- Password Reset Email
- Password Update

Client approval required.

Administrator Login

Administrators can log in using:

- Email Address
- Password

Since administrator accounts will be managed internally, password recovery functionality is excluded from the current scope unless requested.

MODULE 2 – PARTICIPANT PORTAL

Main Navigation

Participants will have access to:

- Dashboard
 - Discover
 - Job Listings
 - Applied Jobs
 - My Profile
 - Messages
 - Sign Out
-

2.1 Dashboard

The participant dashboard will provide a personalized overview.

Application Summary

Display:

- Total Applications
- Active Applications
- Pending Applications
- Offers Received

Recommended Opportunities

Display jobs matched to participant preferences.

Information displayed:

- Job Title
- Employer
- Location
- Duration
- Compensation
- Match Percentage
- Open/Filled Status

Saved Jobs

Display participant saved opportunities.

Profile Completion

Display:

- Profile Completion Percentage
- Missing Information Indicators
- Complete Profile Call-to-Action

Recent Applications

Display:

- Recent Applications
 - Current Status
 - Last Activity
-

2.2 Discover

The Discover section will display personalized job recommendations generated by the matching engine.

Job Information

Display:

- Job Title
- Employer
- Location
- Duration
- Compensation
- Match Percentage
- Availability Status

Matching Algorithm

Jobs will be ranked based on:

- Availability
- Preferred Roles
- Preferred Locations

- Housing Preferences
- Financial Goals
- Lifestyle Preferences
- Flexibility Score

Job Actions

Participant may:

- View Details
- Save Job
- Apply for Job (Pending Client Confirmation)

Note:

The current design does not clearly define the application process. Client confirmation is required regarding whether users should:

- Apply Directly
 - Request Interview
 - Save Only
-

2.3 Job Listings

Display all available opportunities regardless of match score.

Features

Display:

- Job Title
- Employer
- Location
- Compensation
- Match Percentage
- Open/Filled Status
- Application Status

Search

Participants can search jobs using keywords.

Filters

Participants can filter jobs by:

- Location
 - Industry
 - Employer
 - Housing Availability
 - Compensation
 - Job Type
 - Season
 - Duration
-

2.4 Applied Jobs

Participants can view all submitted applications.

Information Displayed

- Job Title
- Employer
- Location
- Application Date
- Current Status

Status Tracking

Possible statuses include:

- Applied
- Interviewing
- Offered
- Placed
- Withdrawn

Application Communication

Participants can access messages associated with applications.

2.5 Participant Profile

Participants can view and edit profile information.

Profile Information

- Profile Photo
- Name
- Location
- Citizenship / Eligibility
- Availability Dates
- Bio
- Industry Interests
- Preferred Destinations
- Skills
- Resume
- Additional Documents

Visibility Controls

Participants can manage profile visibility.

Future Features (Not Included)

The design references:

- AI Bio Rewriter
- Resume Writing Assistant

These are considered future enhancements and excluded from Version 1.

2.6 Program Builder & Matching Profile

Participants can complete a structured profile questionnaire to improve placement accuracy.

Sections

Availability & Timing

- Start Date
- End Date

- Program Length
- Driver's License
- Passport Status
- Vehicle Availability

Role Preferences

- Preferred Roles
- Roles To Avoid
- Role Importance

Location & Lifestyle

- Environment Preferences
- Housing Preferences
- Recreation Importance
- Hobbies & Interests

Financial Goals

- Savings Goals
- Income Expectations

Flexibility & Mindset

- Openness To Alternatives
- Adaptability Preferences

Final Questionnaire

- Additional Notes
- Success Definition

Matching Results

The system will generate:

- Overall Match Percentage
 - Pathway Type
 - Category Scores
 - Job Type Rankings
 - Placement Recommendations
-

2.7 Messaging

Participants will have access to a messaging center.

Features

- View Conversations
- Read Messages
- Reply To Messages
- View Application-Specific Communication

Assumption

Version 1 includes internal messaging between Administrator and Participant.

Real-time chat functionality is excluded unless specifically requested.

MODULE 3 – ADMIN PORTAL

Main Navigation

Administrators will have access to:

- Overview
 - Participants
 - Employers
 - Applications
 - Reviews
 - Sign Out
-

3.1 Overview Dashboard

Administrative dashboard displaying system statistics.

Student Statistics

Display participant counts and summaries.

Employer Statistics

Display employer counts and summaries.

Job Statistics

Display:

- Open Jobs
- Filled Jobs

Job Status Breakdown

Display counts for:

- Applied
- Interviewing
- Offered
- Placed
- Withdrawn

Pending Actions

Display items requiring attention:

- New Participant Requests
 - Employer Verification Requests
 - Incomplete Participant Profiles
-

3.2 Participant Management

Administrators can manage participant records.

Features

- View Participants
- Add Participant
- Edit Participant
- Hide Profile

- Show Profile
- View Matching Opportunities

Matching Management

Administrators can:

- View job matches
- Apply participants to jobs
- Place participants into jobs

Any placement action will be reflected in the participant dashboard.

3.3 Employer Management

Administrators can manage employer records.

Features

- View Employers
- Add Employer
- Edit Employer
- Verify Employer
- Upload Employer Photos
- Add Jobs To Employer

Employer Information

Company Details

- Legal Business Name
- Contact Name
- Job Title
- Email
- Phone
- Company Description
- Website

Location Details

- Address
- City

- State
- Zip Code
- Employee Count
- Nearest Airport
- Transportation Availability

Compensation & Benefits

- Benefits
- Pay Frequency
- Drug Testing Requirements

Interview Process

- Interview Contact
- Interview Method

Housing Information

- Housing Description
- Housing Cost
- Housing Inclusions
- Co-ed Housing
- Housing Photos
- Bedrooms
- Beds Per Room
- Kitchen Availability
- Housing Address
- Housing Deposit
- Refund Policy

Hiring Season

- Desired Start Month
- Desired End Month

3.4 Job Management

Administrators can create and manage job opportunities.

Features

- Add Job
- Edit Job
- Archive Job
- Link Job To Employer

Job Information

Position Details

- Employer
- Position Title
- Description
- Qualifications
- Pay Rate
- Number Of Positions

Season & Timing

- Season
- Start Month
- End Month
- Hours Per Week
- Experience Requirements

Housing & CPI

- Housing Type
- Housing Cost
- Meals Provided
- CPI Score

3.5 Application Management

Administrators can manage all applications.

Features

- View Applications
- Search Applications
- Filter Applications
- Message Participants
- Update Status

Application Status Workflow

Administrators can manually update application status:

- Applied
- Interviewing
- Offered
- Placed
- Withdrawn

Status updates will automatically appear within the participant dashboard.

Email Notifications

The system will send email notifications when:

- Application Status Changes
 - Participant Is Placed
 - Offer Is Received
 - Interview Status Changes
-

3.6 Review Management

Administrators can manage participant reviews.

Features

- View Reviews
- Add Reviews
- Edit Reviews
- Delete Reviews

Review Fields

- Participant Name
- Employer
- Job Title
- Rating
- Review Comments

Statistics

Display:

- Total Reviews
 - Average Rating
 - Jobs Reviewed
-

MODULE 4 – NOTIFICATIONS

Participant Notifications

- Application Updates
- Interview Updates
- Placement Updates
- New Messages

Administrator Notifications

- New Applications
- Employer Verification Requests
- Incomplete Profiles
- New Messages

Notifications will be delivered via email.

MODULE 5 – DATABASE & DATA MANAGEMENT

The system will include database storage for:

- Participants
- Employers
- Jobs
- Applications
- Messages
- Reviews
- Matching Profiles
- Status History

All administrator changes must be saved and reflected throughout the system.

OUT OF SCOPE (VERSION 1)

The following items are not included unless specifically requested:

- AI Bio Rewriter
 - AI Resume Assistant
 - Real-Time Chat
 - SMS Notifications
 - Employer Login Portal
 - Mobile Application
 - Video Interview Integration
 - Moodle Course Integration
 - Third-Party Payroll Integrations
-

Questions and answers not reflected in scope above but need to be included

1. Should participants apply directly to jobs or request interviews first?
They should request an interview which notifies us either in the system or in email (maybe both)
2. Should Forgot Password functionality be included for participants?
Yes
3. Should employers have their own login portal?
Let's create a framework to add this in the future but not right now because I want to simplify the build so Admin will act as the employer building out profiles and jobs and coordinating interviews to start.
4. Should messaging be inbox-style or real-time chat?
Inbox style is probably better for now
5. What exact formula should be used for job match percentage calculations?
Attaching a separate document for the formula
